Associates in Arts in Art History for Transfer Degree

The Associate in Arts in Art History for Transfer (AA-T) prepares students for transfer to four-year colleges and universities and for careers in education, museums, research, and related fields. The program prepares the student to further their studies of the history of the practice and production of visual arts and uses the study of art history as the study of objects within their historical, cultural and stylistic context. This is complemented by the requirement of two studio classes where the art history student learns the basic skills and concepts inherent in creating a work of art.

Program Learning Outcomes

Upon successful completion of this program, students should be able to:

- Develop critical interdisciplinary thinking, both in oral and written form, through comparative analysis and development of visual acuity.
- Discern and appreciate the wide range of ethnically, culturally, and socially diverse art forms, representations, and practices.
- Apply art history terminology in the analysis and evaluation of works of art and architecture through written tests, presentations, and oral discussions, the intersection of form, content, and patronage in the formation of visual culture.

Students who complete an AA-T or AS-T are given priority consideration when applying to a particular program that is similar to the student's community college major. Students completing the AA-T are guaranteed admission, but not necessarily to the major or campus of their choice.

This is consistent with the mission of the community colleges as established by the Legislature in Education Code section 66010.4. This course offers academic instruction and will grant an associate's degree. In addition, it is our goal to assist students in seamlessly transferring to a Political Science baccalaureate degree program at a CSU.

Program Learning Outcomes

Upon successful completion of this program, student should be able to:

- Demonstrate the ability to write narrative and critical thought essays, book reviews, and research papers.
- Exhibit proficiency in the oral reporting of research.
- Analyze data for interpretation and analysis.
- Understand the association of history with the humanities and social sciences.
- Differentiate primary from secondary sources.

Associate in Arts in Political Science for Transfer Degree

The Associates in Arts in Political Science for Transfer (AA-T) helps students learn about the operation of political authority at the local, national, and international levels. Besides studying American political institutions, students will examine other governments, their civil codes, policy issues, and decision making. In addition appreciation will be gained for the growing role of international actors, and importance of global issues. The AA-T in political science is intended for political science majors who seek a bachelor's degree in a similar major at a CSU campus. Associates in Science in Early Childhood Education

The AS-T in Early Childhood Education is designed to provide a clear pathway to a CSU major and baccalaureate degree. California Community College students who are awarded an AS-T degree are guaranteed admission with junior standing somewhere in the CSU system and given priority admission consideration to their local CSU campus or to a program that is deemed similar to the Early Childhood Education major. This priority does not guarantee admission to specific majors or campuses. Students who have been awarded an AA-T or AS-T are able to complete their remaining requirements for the 120 - unit baccalaureate degree within 60 semester units.

Program Learning Outcomes

Upon successful completion of this program, student should be able to:

- Students will apply research theories, social interrelationships and developmentally age appropriate curriculum based on their observations and assessments as to the why and reasoning behind the specific activities that contribute toward the development of the young child.
- Students will advocate the needs for support for young children and the best practices for their education. Students will create a high quality learning environment that facilitates the emotional, cognitive, language, physical and social domains.
- Students will embrace the value of higher (further) education to enhance opportunities in the future.
