Meeting ID: 966 7422 0056

Within the field of entertainment, many representations of people of color are based on cultural stereotypes. The harm inherent in these practices serves to lower the self-esteem and self-concept of those from the nondominant group and fosters negative perceptions and intensifies preexisting racial fear and distrust within the dominant group. These films will explore these ideas and will provide a starting point for panel led discussions about stereotypes, prejudice, and effecting social change.
